Payment & Refund Policy

DemoMart | Synthetic payment document | Version 1.0 | Updated September 2026

DemoMart is a fictional online store used only for RAG development and testing. The policies below are synthetic demo data and do not describe a real company.

1. Accepted Payment Methods

Method	Supported use	Notes
Credit/Debit card	Standard online purchases	3D Secure or bank authentication may be required.
UPI	Eligible purchases in India	The UPI app must confirm the payment before the order is created.
Net banking	Eligible purchases in India	Availability depends on the payment gateway and bank.
DemoMart gift card	Eligible product purchases	Gift card balance is applied before other eligible payment methods.

2. Payment Authorization vs. Final Charge

A payment authorization confirms that the payment provider can reserve funds. An authorization is not always the same as a captured charge. If an order is cancelled before capture, the reserved amount may disappear automatically according to the bank or payment provider timeline.

Duplicate pending transactions

Customers may temporarily see multiple pending authorizations after repeated checkout attempts. DemoMart only captures the amount linked to a successfully created order. Extra pending authorizations are normally released by the payment provider without a separate refund transaction.

3. Refund Eligibility

Refunds are issued for approved returns, eligible cancellations, unavailable items, duplicate captures confirmed by DemoMart, and orders that qualify for a refund under a separate product-specific guarantee.

• Approved return: refund is initiated after the return passes inspection.

• Cancelled before shipment: refund is initiated after cancellation is confirmed, unless the payment was only an authorization and is released by the provider.

• Out-of-stock after purchase: DemoMart cancels the affected item and refunds the unavailable amount.

• Partial return from a multi-item order: only the approved returned item(s) and any applicable refundable shipping amount are refunded.

4. Refund Timing

Refund stage	Typical demo timeline
DemoMart approves refund	Within 2 business days after approval or inspection
Bank/payment provider posting	Usually 3-7 business days after the refund instruction
UPI refund visibility	Often within 24-72 hours, depending on the payment provider
Gift card refund	Usually within 1 business day to the DemoMart gift card balance

The final time visible in a customer bank account can be longer than DemoMart processing time because posting depends on the payment provider or bank.

5. How Refunds Are Sent

Refunds normally return to the **original payment method**. For an order paid using multiple methods, DemoMart refunds each eligible component according to the payment allocation. A gift-card-funded amount generally returns to the gift card balance, while a card-funded amount returns to the original card.

Cash refunds

DemoMart does not provide cash refunds for online card, UPI, or net-banking payments.

6. Refunds for Shipping Charges

Standard delivery charges are refundable only when the full order is cancelled before dispatch, the order could not be fulfilled, or DemoMart explicitly accepts shipping as part of the refund. For a change-of-mind return, original standard shipping charges are normally non-refundable.

7. Payment Failures

Payment declined

A declined payment does not create a completed order. Customers should verify card limits, bank authentication, UPI approval, or network availability and then retry using the same or another supported method.

Payment successful but checkout shows failure

Do not immediately retry several times. First check the Orders page and email for an order number. If no order appears, the payment may be a pending authorization that will be released automatically. Contact support with the payment reference if the amount remains pending beyond 48 hours.

8. Refund and Payment FAQs

Can I change the refund destination to another card?

No. Refunds are generally returned to the original payment method for security and reconciliation reasons.

Why did I receive a smaller refund than the item price?

Possible reasons include non-refundable original shipping, an applied discount allocation, a partial return, or a deduction permitted by the applicable return terms. The refund summary in the order details shows the components.

What payment information should I send support?

Send the order number and payment reference plus the date and amount of the transaction. Do not send a full card number, CVV, UPI PIN, OTP, or banking password.
