Return Policy

DemoMart | Synthetic returns document | Version 1.0 | Updated September 2026

DemoMart is a fictional online store used only for RAG development and testing. The policies below are synthetic demo data and do not describe a real company.

1. Standard Return Window

Eligible products may be returned within **30 calendar days** of delivery for a change of mind. Some products have different windows or are non-returnable, as stated on the product page or checkout summary.

2. Return Condition Requirements

• The item should be unused and in resalable condition for a change-of-mind return.

• Original accessories, tags, manuals, and packaging should be included where supplied.

• For defective or incorrect items, customers should provide a description of the issue; photos may be requested when they help confirm the problem.

• Returns may be rejected when damage or wear indicates use outside normal inspection.

3. Returnable and Non-Returnable Categories

Category	Standard return?	Common special rule
Apparel and footwear	Yes	30 days; hygiene tags must remain attached where applicable.
Electronics	Usually	Opened units may be inspected for condition, accessories, and serial number.
Personalized items	No	Only defective, damaged, or incorrectly produced items may qualify.
Digital downloads	No	Not returnable after access or download is provided.
Gift cards	No	Non-refundable after purchase except where required by law.
Consumable/sealed hygiene goods	Limited	Must remain sealed unless the product arrived defective.

4. Starting a Return

• Open Account > Orders and choose the delivered order.

• Select Return for the relevant item and choose the return reason.

• Choose the available return method: pickup, drop-off, or self-ship when offered.

• Pack the item securely. Remove or cover old shipping labels on the outside of the package.

• Keep the return receipt or tracking number until the refund is completed.

5. Return Shipping Responsibility

When the item is wrong, damaged on arrival, or defective, DemoMart normally provides a prepaid return method where available. For a change-of-mind return, the customer may be responsible for return shipping unless the order or promotional terms state otherwise.

6. Inspection and Refund Approval

After the return arrives, the processing team checks the item against the selected return reason. Standard inspection generally begins within 2 business days. Approved refunds follow the Payment & Refund Policy. If a return is rejected, DemoMart sends an explanation and may arrange return shipment of the item back to the customer.

7. Partial Returns

Customers can return one or more eligible items from a multi-item order without returning every item. Refunds are calculated for the approved item(s), applicable taxes, and any other refundable amounts tied to those items. Bundle discounts can change the final refund allocation.

8. Damaged or Incorrect Items

Customers should report a damaged or incorrect delivery as soon as practical. Do not throw away the product, packaging, or shipping label until support confirms the next step. DemoMart may arrange a replacement, refund, or return based on stock and inspection.

9. Return Statuses

Status	Meaning
Return requested	The return request has been created but the parcel has not necessarily been handed to the carrier.
In transit	The carrier has accepted the return parcel.
Received	The processing center has received the parcel.
Under inspection	The return is being checked for eligibility and condition.
Approved	The refund or replacement process has been authorized.
Rejected	The return does not meet the applicable return requirements.
Completed	The refund, replacement, or other resolution has been completed.

10. Return FAQs

Can I return an exchange item?

A replacement received through an exchange can generally be returned only if the replacement itself remains eligible under the return rules. The original and replacement transaction may be linked in the order history.

What if I missed the return deadline by one day?

Standard change-of-mind returns are normally blocked after the published window. Defective or warranty cases may follow a separate process.
